Data 2016-09-01

During the November 2013 till January 2014 company "Breezemarine Group Ltd." (Tallinn, Estonia) made installation «from scratch» including design and commissioning of FCM (fuel consumption measurement) system for ferry «Patria Seaways» company AB DFDS Seaways, (Lithuania, Klaipėda).

Mounted screw flowmeters for each of vessel main engine, touch screen control panel installed in engine control room and on the navigation bridge. Measured real time consumption indicated on screens in engine room and bridge. FCM system help to bridge officers monitoring of real time consumption.

I note the quality of the interaction and service of "Breezemerine Group" company, as well FCM System installation helps to monitor of real time and passage consumption.

Best regards/Pagarbiai
